

Invention relates to spray device for agricultural field sprayer for metered application of spray liquid, as well as to agricultural field sprayer with such spray device. Spray device (10) comprises a swiveling sprayer boom (11) with two side booms (12), each of which contains a certain number of metering elements (13) for spraying and/or finely distributing the spray liquid. Wherein, at least one liquid distributor (14) for dividing the flow of the sprayed liquid into several sub-flows, which has at least one distribution inlet (14a) for supplying the sprayed liquid of water and several distribution outlets (14b) for the sub-flows. Wherein, each of the metering elements (13) is hydraulically connected to the corresponding distribution outlet (14b) via a metering line (15).
