

Dispensing cap comprises a housing with a thread, and two caps, upper and lower, disposed above the housing, wherein the upper cap is configured to be put on the lower cap. Wherein the caps are connected to each other, and each of the caps has an opening intended for dispensing a pasty food product. A diameter of the opening of the lower cap is larger than a diameter of the upper cap, and the caps are arranged coaxially. The upper cap has a lid connected to the upper cap and configured for closing and opening the opening of the upper cap. Wherein the dispensing cap is configured for installation on a container with a pasty food product.
