

Method for producing non-alcoholic carbonated drink with lavender and berries. To prepare the drink, a combination of natural plant-based ingredients is used: dried lavender, fresh mint, lemon juice, berry puree, and a natural sweetener, where all ingredients are mixed with filtered water and carbonated with carbon dioxide (CO₂), in the following ratio, per 1 liter of drink:

dried lavender	1 g
fresh mint	6-10 g
lemon juice	80-100 ml
topinambour syrup as a natural sweetener	30-40 ml
berry puree from mulberries, blueberries, blackberries and currants	30-50 g
filtered water	the rest to 1 l.
