

Antifungal and antibacterial shoe and clothing dryer features ultraviolet emitter, heating chamber equipped with perforation, each section of which is shaped like a three-dimensional shoe toe. Dryer includes fan-equipped solar air collector connected via flexible, heat-insulated air duct to cabinet, inside which air ducts are installed with spacer pipes positioned at an angle to the vertical of each individual pipe. Clothing hangers are located in the upper part of cabinet. Cabinet cover is perforated. Ultraviolet emitter units are multiplied and mounted on cabinet floor beneath each pair of spacer tubes.
