

Method for producing dry mixture for an instant beverage based on powdered milk involves mixing milk base with dry ingredients and packaging. Wherein, whole milk powder with a fat content of 25.0% is used as the milk base, to which horseradish tree powder, vacuum-dried lime and mint powders are added as dry ingredients during the mixing stage, in a ratio of 1:1:1:1, respectively. Mixing is carried out for 45 minutes in a mixer, after which the mixture is packaged.
